

Community of Practice (CoP) for Asia Work Plan 2025-2026

Background

The project “Innovation Regions for a Just Energy Transition” (IKI-JET) aims at supporting key stakeholders of coal regions to plan for and implement regional just energy transition pathways away from coal and towards a low-carbon energy system, consistent with the Paris Agreement and the ILO Just Transition Guidelines.

In the framework of the IKI-JET project, the ILO is facilitating a Community of Practice (CoP) in Asia, focused on policymakers and other stakeholders involved in just energy transition processes. The CoP is designed to facilitate peer-to-peer knowledge exchange, promote collaborative approaches to common challenges, and foster the development of shared resources and practices. More information available in the [JET CoP concept note](#).

Programme of Work 2025-26

Date	Activities and Topics
